

TESTIMONIAL FROM A SATISFIED CUSTOMER
ON THE DAYTEK HI-DRY CLOTHESLINE SYSTEM

"As working individuals with no domestic help, we run a very tight schedule, and are restricted in the times we are able to carry out laundry chores. As a result, we needed a system which is flexible, and allows us to hang up the laundry to dry without too much effort. Ezi-Living's DAYTEK clothes hangers enable us to hang up the laundry very quickly and efficiently due to the smart system of laundry management, as well as minimising the effort of hanging heavy washing loads out to dry."

"This has eliminated potential back problems resulting from balancing the traditional bamboo poles laden with damp laundry. The system's ease of use and versatility, including the minimal space requirements and unobtrusive storage have been compelling reasons for us to continue to use the system in our new place."

"Most importantly, the flexibility of deployment given the extremely tight constraints of our washing yard in our new place is something which only the DAYTEK system could accomodate after reviewing the many options available in the market. These factors have shown conclusively that the DAYTEK system will continue to be our choice in the years ahead. We would not consider returning to bamboo poles ever again!"
